

CLAIMS

I claim:

1. (Cancelled)
2. (Previously Presented) The method according to claim 38 wherein a contractor is provided with said authorization code that is presented at a bid letting along with said contractor's bid, said authorization code permitting an owner/obligee to receive an approved bond through said computer network.
3. (Previously Presented) The method according to claim 38 wherein the bond is a surety bond.
4. (Previously Presented) The method according to claim 38 wherein the bond is a bid bond.
5. (Previously Presented) The method according to claim 38 wherein the bond is a contract bond.
6. (Previously Presented) The method according to claim 38 wherein the bond is a court bond.
7. (Previously Presented) The method according to claim 38 wherein the bond is a subdivision bond.
8. (Previously Presented) The method according to claim 38 wherein the bond is a performance bond.
9. (Previously Presented) The method according to claim 38 wherein the bond is a customs bonds.
10. (Previously Presented) The method according to claim 38 wherein the bond is a notary bond.
11. (Previously Presented) The method according to claim 38 wherein the bond is a liquor license bond.
12. (Previously Presented) The method according to claim 38 wherein the bond is a license

09/694,776

bond.

13. (Previously Presented) The method according to claim 38 wherein the bond is a permit bond.

14. (Previously Presented) The method according to claim 38 wherein the bond is a Small Business Administration bond.

15. (Previously Presented) The method according to claim 38 wherein the bond is a bail bond.

16. (Previously Presented) The method according to claim 38 wherein the bond is a supersedeas bond.

17. (Previously Presented) The method according to claim 38 wherein the network is accessed by a password and the bond is accessed by said authorization code.

18. (Cancelled)

19. (Cancelled)

20. (Previously Presented) The system according to claim 41 wherein a contractor is provided with said authorization code that is presented at a bid letting along with said contractor's bid, said authorization code permitting an owner/obligee to receive an approved bond through said computer network.

21. (Previously Presented) The system according to claim 41 wherein the bond is a surety bond.

22. (Previously Presented) The system according to claim 41 wherein the bond is a bid bond.

23. (Previously Presented) The system according to claim 41 wherein the bond is a contract bond.

24. (Previously Presented) The system according to claim 41 wherein the bond is a court bond.

25. (Previously Presented) The system according to claim 41 wherein the bond is a subdivision

09/694,776

bond.

26. (Previously Presented) The system according to claim 41 wherein the bond is a performance bond.

27. (Previously Presented) The system according to claim 41 wherein the bond is a customs bonds.

28. (Previously Presented) The system according to claim 41 wherein the bond is a notary bond.

29. (Previously Presented) The system according to claim 41 wherein the bond is a liquor license bond.

30. (Previously Presented) The system according to claim 41 wherein the bond is a license bond.

31. (Previously Presented) The system according to claim 41 wherein the bond is a permit bond.

32. (Previously Presented) The system according to claim 41 wherein the bond is a Small Business Administration bond.

33. (Previously Presented) The system according to claim 41 wherein the bond is a bail bond.

34. (Previously Presented) The system according to claim 41 wherein the bond is a supersedeas bond.

35. (Previously Presented) The system according to claim 41 wherein the network is accessed by a password.

36. (Cancelled)

37. (Cancelled)

38. (Currently Amended) A method of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party

09/694,776

computer, said method comprising:

- a) an agent who receives a request for a surety bond from an applicant, said surety bond being required from said applicant by a third party, using a computer network to selecting a surety from one or more sureties that have approved said agent to issue surety bonds on said surety's behalf;
- b) providing said surety over a computer network with the identity of said applicant requesting said bond and such other information said surety may require about said applicant so that a surety bond may be issued by said surety;
- c) requesting from said surety over said computer network a decision on whether the bond is approved;
- d) receiving from said surety over said computer network a decision on whether the bond is approved;
- e) where said bond request is approved by said surety, said surety providing an authorization code over said computer network for an approved bond to said applicant;
- f) submitting said authorization code to a third party requiring said bond;
- g) permitting said third party requiring said bond to use said authorization code over said computer network to access said bond issued by said surety;
- h) said surety issuing said surety bond through said computer network to said third party after receipt of the authorization code.

39. (Currently Amended) A method of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party

09/694,776

computer, said method comprising:

- a) an agent who receives a request for a surety bond said agent using a computer network to selecting a surety from one or more sureties that have approved ~~an~~ said agent to issue surety bonds on said surety's behalf;
- b) providing said surety with the identity of a contractor and such other information said surety [may] requires about said contractor and said bond over a said computer network;
- c) selecting the ~~type of~~ bond desired by said contractor over said computer network;
- d) providing said surety with information, over said computer network, on a contract to be performed by said contractor for which a bond is required;
- e) receiving from said surety a decision on whether the bond is approved;
- f) providing an authorization code, said computer network, for an approved bond to said contractor to be submitted with said contractor's bid;
- g) permitting a third party that requires said bond to use said authorization code, over said computer network, to obtain the bond issued by said surety.

40. (Currently Amended) A method of obtaining information concerning a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said method comprising:

providing a computer network with the identity of an applicant who requested a bond and such other information about said applicant that is requested by said surety;

selecting surety, over said computer network;

said surety making a decision on whether to issue a bond on the applicant's

09/694,776

information provided to said computer network

said surety providing said computer network with an authorization code for an approved bond;

a third party who receives said authorization code accessing said computer network by providing said network with said authorization code;

said third party obtaining from said computer network information concerning said bond.

41. (Currently Amended) A system of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said system comprising:

- a) a means for an agent to select a surety, over said computer network, from one or more sureties that have approved said agent to issue surety bonds over said computer network on said surety's behalf;
- b) a means for providing said surety, over said computer network, with the identity of an applicant requesting said bond and such other information said surety [may] requires about said applicant over a computer network;
- c) a means for ~~receiving~~ requesting from said surety over said computer network a decision on whether the bond is approved;
- d) a means for providing an authorization code for an approved bond to said applicant to be submitted to a third party requiring said bond;
- e) a means for permitting said third party requiring said bond to use said authorization code

09/694,776

over said computer network to access said bond issued by said surety;

- f) a means for issuing said surety bond through said computer network to said third party after receipt of the authorization code.

42. (Currently Amended) A system of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said system comprising:

- a) a means for selecting a surety, over said computer network from one or more sureties that have approved an agent to issue surety bonds over said computer network on said surety's behalf;
- b) a means for providing, over said computer network said surety with the identity of a contractor and such other information said surety may require about said contractor over a computer network;
- c) a means for selecting the type of bond ~~desired~~ requested by said contractor over said computer network ;
- d) a means for providing said surety over said computer network with information on a contract to be performed by said contractor for which a bond is required;
- e) a means for ~~receiving~~ requesting from said surety over said computer network a decision on whether the bond is approved;
- f) providing an authorization code for an approved bond over said computer network to said contractor to be submitted with said contractor's bid;
- g) permitting a third party that requires said bond to use said authorization code to obtain the

09/694,776

bond issued by said surety over said computer network .

43.(Cancelled)

44. (Previously Presented) The method according to claim 38 wherein said agent provides said surety with a name of a contractor, said contractor's address, the identity of an owner/ obligee for whom the bond is required, an identification of the bond form required, an estimated contract price, an amount of the bid security, a contract number or IFB number, and a description of the job.

45. (Previously Presented) The method according to claim 44 wherein said owner/obligee is a governmental agency, a private owner, a construction manager, or a general contractor.

46. (Currently Amended) A method of obtaining a surety bond over a computer network, said computer network comprising, at least an agent computer, a surety computer, and a third party computer, said method comprising: comprising:

an applicant for a bond said applicant accessing [the] a website of a bonding ~~agency agent~~ through a login and a password;
